

### HARDWARE NEEDED TO ATTACH GUARDRAILS TO DURAFIRM DIVING STANDS

The following is a list of what you will receive when ordering DuraFirm Diving Stands WITH guardrails. This list will also advise you what small parts you will need to order if you plan to attach guardrails to your DuraFirm Diving Stands or if you need to replace any guardrail hardware.

**SS = "Short Stand"**

**SGR1S = Single Guardrails on ONE side**

**SGR2S = Single Guardrails on TWO sides**

**DGR2S = Double Guardrails on TWO sides**

	SS	SS	SS	1 Meter	1 Meter	1 Meter	3 Meter
	SGR1S	SGR2S	DGR2S	SGR1S	SGR2S	DGR2S	DGR2S
<b>SF105</b>	12	22	22	12	22	22	22
<b>SF106</b>	5	10	2	5	10	2	2
<b>SF110</b>	12	22	22	12	22	22	22
<b>SF117</b>	4	6	10	4	4	6	6
<b>SF118</b>	8	14	18	8	14	18	18
<b>SF119</b>	2	4	12	2	4	12	12
<b>SF153</b>	0	0	2	0	0	2	6
<b>*SB404</b>	0	0	2	0	0	0	0
<b>C206</b>	0	0	2	0	0	2	2
<b>C207</b>	8	14	26	8	14	26	26

<b>SF105</b>	3/8" x 1 1/4" Aluminum hex-head bolt with SF110 nut for bolting rail supports to fulcrum box.
<b>SF106</b>	3/8" x 1 1/2" Aluminum hex-head bolt with SF110 nut for bolting rail supports to fulcrum box.
<b>SF110</b>	Not sold separately -- they come with bolts
<b>SF117</b>	5/16" x 1/2" Stainless Steel Rail Clamp Bolt
<b>SF118</b>	5/16" x 5/8" Stainless Steel Rail Clamp Bolt
<b>SF119</b>	5/16" x 3/4" Stainless Steel Rail Clamp Bolt
<b>SF153</b>	5/16" x 7/8" Stainless Steel Rail Clamp Bolt - used only on Stands with DGR2S
<b>*SB404</b>	Left or Right Painted Aluminum Rail Bracket. These attach to back of "Short Stand" and are used to hold the guardrails to the back of the "Short Stand."
<b>C206</b>	Bronze Rail Bracket for 1M and 3M - You must also order separately (2) C207 and (2) SF118 to attach the guardrails to the Bronze Rail Bracket.
<b>C207</b>	Stainless Steel Rail Clamp -- Attaches the guardrail to the rail support castings ("arms") of the DuraFirm Stand.

**NOTES:**

Most of the bolts listed above are painted. Recommend touch-up paint to coat nuts and threads after installation. (Item # MP105)

The reason you must sometimes use different bolt lengths is that some of the rail support castings are thicker than others. If the bolt is too long, you cannot properly tighten it.

The SB404's are NOT in the hardware box -- rather, they are attached to the stand itself. If you already have a "Short Stand" and plan to add guardrails to it, you must order the SB404's separately in order to attach the guardrails to the stand.
