

DURAFIRM STRAIGHT GUARD RAIL SPECIFICATIONS

The following information pertains to a the straight guardrail of a Durafirm Diving Stand

- They are 9 ½ feet long
- They are made of #303 Stainless Steel
- They have a 1 ½” outside diameter
- The guardrail “wall” has a thickness of .065

NOTE: The straight rail for Durafirm Diving Stands can be used on ALL models including “short” stands or stands with “legs.”

The curved rail for a Durafirm diving stand with legs is slightly different that the curved rail for a Durafirm “short” stand which means they are not interchangeable. If you are converting a Durafirm stand with legs to a Durafirm “short” stand, you can use your straight rail but you must order a new curved rail – one that will fit the “short” stand.

ADDITIONAL INFORMATION ABOUT CURVED RAILS:

The height of the “curved” rail of the double guardrail set-up is 37 inches above the diving board. The height of the “curved” rail of the single guardrail set-up is 26.5 inches above the diving board.
