FLAME CERTIFICATIONS FOR NORBERT'S PITS AND MATS

NOTE: California law provides for certain rules and regulations regarding fire and flame retardant properties of various equipment and objects.

Although the foam used in Norbert's Landing Pits IS fire retardant, the vinyl is not. It's never required since these are not made for sleep or used in a facility where people are sleeping.

If necessary, we can make a landing pit with a fire retardant cover, but it would cost approximately 15% more for the vinyl.
