

"Your Complete Source for Springboard and Platform Diving Equipment and Supplies"

OVERHEAD SPOTTING RIG **Pre-Production / Quote Sheet**

The "standard" Overhead Spotting Rig comes complete with two ceiling attachment clamps; one single pulley; one double pulley; two pulley attachment links; two lengths of spotting rope; and two swivel clips (used to attach spotting rope to spotting belt). In most cases, the person doing the spotting stands directly beneath the double pulley so they can pull straight down on the ropes. Occasionally a pool deck or floor configuration is such that an additional ceiling attachment clamp and second double pulley is required. Spotting Belt / Twisting Belt are sold separately.

Overhead spotting (lifting) of human weight creates the possibility of catastrophic injury including paralysis and even death from landing on the head or neck. All users of overhead spotting rigs should know their limitations and the limitations of the equipment.

YOUR NAME: _____ POSITION / TITLE: _____

FACILITY or SCHOOL: _____ CITY / STATE / ZIP: _____

PHONE NUMBER: _____ E-MAIL: _____

This spotting rig will be installed over: Trampoline / Dry Board / Diving Board / Other (Please circle)

The distance from the ceiling attachment point to the floor or water surface is: _____

The ceiling where the spotting rig will be installed is FLAT or ANGLED (Please circle)
